DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/9/2005 has been entered.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 9/9/2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Response to Arguments

4. Applicant's arguments filed 9/9/2005 with respect to claims 41-51 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Allowable Subject Matter

5. Claims 41-51 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2615

Regarding independent claim 41, the prior art of record fails to teach or fairly suggest the combination of the limitations of claim 41 that includes “a second controller adapted to **stop overwriting a new first signal in the storage area when a capturing operation of a second signal is designated after the new first signal begins to overwrite in the storage area,** wherein the second signal is generated by said image sensor when a light to said image sensor from the object is not shielded by said shielding member; and **a correction unit adapted to correct the second signal based on a most recent first signal stored with a complete frame in said storage area before the capturing operation of the second signal is initiated.”**

Regarding independent claim 51, the prior art of record also fails to teach or fairly suggest the combination of the limitations of claim 51 that includes “a second control **step of stopping overwriting a new first signal in the storage area when a capturing operation of a second signal is designated after the new first signal begins to overwrite in the storage area,** wherein the second signal is generated by the image sensor when a light to said image sensor from the object is not shielded by the shielding member; and **a correction step of correcting the second signal based on a most recent first signal stored with a complete frame in the storage area before the capturing operation of the second signal is initiated.”**

Regarding claims 42-50, these claims either directly or indirectly depend from claim 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
